DETAILED ACTION

Response to Arguments

Applicant's arguments, see pages 8-10, filed February 13, 2006, with respect to independent claims 1, 15, and 16 have been fully considered and are persuasive. The rejections of claims 1, 15, and 16 have been withdrawn.

Allowable Subject Matter

Claims 1-5, 8, 10-16, and 19-28 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or suggest the step/means for *transcribing textual data into semantic units of words using a recognition system for an identified data type of the textual data, using a language model and a phonetic dictionary of semantic units where the textual data is indexed by the semantic units*. Chu (U.S. Patent 6,374,210), as used in the previous rejections, does not teach indexing textual data by semantic units of words. Rather, Chu teaches generating an index of word candidates. The prior art of record does not suggest the combination of multiple data type support (by identifying a data type of the data and using a recognition system for that data type), transcription into semantic units of words using a language model and phonetic dictionary of semantic units (subword semantic representations), and using the transcribed semantic units to index the stored textual data.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
